Description

Email from Jacki:

I now have several people in this area that would like to talk to you. One of these has had the ND State out to their place and checked the water and dead trees, they were told this is all natural and there are no problems in this area. He also has dead cows and a sick child. An uncle of his has this rash all over like I do, and has been to doctors for it, is on his way to Mayo Clinic, just as I did to try to find the cause. Hope to talk to you on Monday, Jacki

Personal Notes
